**LIMITED SPACES  
ARE NOW  
AVAILABLE FOR  
ONEs AND TWOs!**

We believe a language rich environment is crucial to the development of young children with hearing loss. Our primary goals are to foster language and communication, develop thinking and problem-solving skills, and nurture socialization through sign language and spoken English.

We believe that non-structured, spontaneous play provides natural opportunities to build on children's existing language.

We believe that structured time together helps to reinforce and refine skills.

We create activities where children are supported to master developmentally appropriate skills, learn new vocabulary, express themselves, build confidence in who they are, and most of all...have fun!

(Prerequisite Skills: Children must be ambulatory (walking, crawling) and be able to eat with minimal assistance)

Please contact Katie Boyd DeFeo for details about these free services
